Days, months, and years (A1-)
Teacher's notes

## Task 15.

Students work in pairs. They receive a set of cards (see following page) showing different dates.

The cards are shuffled and placed face down on the desk.

Student A asks "What is the date?" Student B takes one of the cards and says the date written on it. Students take turns asking and answering the question.

The teacher can write on the board the question "What is the date?" and add an example answer such as "It is Wednesday, the $15^{\text {th }}$ of March 1992" to help the students.
